

Test Analyst

London, UK

Fixed term Maternity Cover, 6 months

£30,000 pro rata

Who we are

At iPLATO we are more than a tech company. We are revolutionising the health care industry. We are committed to delivering powerful digital solutions that improve lives and to have fun while doing it. Serving millions of patients and thousands of healthcare professionals every day we are a leader in Health Tech.

Across this network our digital solutions enable data driven patient engagement, personalised online consultation powered by machine learning and patient support to people living with diabetes, hypertension and epilepsy. Our aim is to connect patients and transform healthcare.

About the role:

You will be responsible for quality assurance and the end to end testing of our consumer facing mobile apps and business to business web application.

Reporting to Test Manager, the main responsibilities will be to:

- Ensuring that our software deliverables are to a very high quality
- Rapidly writing and executing test scripts – delivering a re-usable set of regressions test scripts for future releases.
- Providing status updates regarding test progress, results, and unresolved problems
- Writing bug reports in JIRA
- Helping us move toward a continuous integration model of development

What we are looking for:

Essential:

- ISEB/ISTQB Certificate in Software Testing
- 2+ years Mobile/Web testing and QA experience in an Agile Environment
- Running functional test in different environments including Web and Mobile
- Experience of manual/exploratory testing
- Team player with a 'can do' attitude
- Great attention to detail
- Excellent verbal communication skills with the ability to communicate effectively with technical and non-technical colleagues at all levels
- Good problem solving and diagnostic skills
- The ability to work well under pressure and prioritise conflicting demands
- Experience of writing Java based test automation scripts using Selenium Webdriver) for both Web and Mobile using Eclipse IDE
- A degree in a technical discipline, Computer Science preferred

Desirable:

- Knowledge in using Appium for mobile automation testing framework
- Experience in creating automation tests suite using Page Object Modelling for mobile and web.
- Create test reports using TestNG for automation scripts
- Integrate Cucumber BDD
- Agile methodologies and the corresponding Quality Assurance practices (knowledge of other methodologies is also an advantage).
- Creating and running end to end tests including API calls

What we offer

- A full structured training programme to ensure you are confident in your new role
- 25 days holiday plus bank holidays
- Company Share Option scheme and travel loan after probation is passed
- An amazing team and fun social calendar
