

Automation Tester

London, UK

Permanent

Circa £40,000 per annum

Who we are

At iPLATO we are more than a tech company. We are revolutionising the health care industry. We are committed to delivering powerful digital solutions that improve lives and to have fun while doing it. Serving millions of patients and thousands of healthcare professionals every day we are a leader in Health Tech. Across this network our digital solutions enable data driven patient engagement, personalised online consultation powered by machine learning and patient support to people living with diabetes, hypertension and epilepsy. Our aim is to connect patients and transform healthcare.

About the role:

The Automation tester is an essential role that is being newly instated into the technology team. You will be responsible for quality assurance and the end to end regression automation testing suites of our consumer facing mobile apps and business to business web application.

Reporting to Test Manager, the main responsibilities will be to:

- Ensuring that our software deliverables are to a very high quality
- Rapidly writing and executing test automated test scripts – delivering a re-usable set of regressions test scripts for future releases of web and mobile application
- Helping us move toward a continuous integration model of development and test

What we are looking for:

Essential:

- ISEB/ISTQB Certificate in Software Testing
- 2 years+ Mobile/Web testing and QA experience in an Agile Environment
- Team player with a 'can do' attitude
- Excellent verbal communication skills with the ability to communicate effectively with technical and non-technical colleagues at all level
- The ability to work well under pressure and prioritise conflicting demands
- A degree in a technical discipline, Computer Science preferred
- Implement automation framework for testing and production environment using selenium webdriver written in Java
- Design, develop and maintain automated scripts for black and white box tests
- Automation scripts to be designed in Gherkin style format for Web/Mobile Application
- RESTful API testing using PostMan and apiary as documentation
- Creating cross-platform mobile UI automation framework using Appium for both Android and iOS using Selenium
- Ability to create test suite for JMeter or equivalent
- Creating and running end to end tests including API calls

Desirable

- Experience of code control systems like GIT
- An understanding of Performance Testing
- Knowledge of at least one programming language – Java/PHP preferred

Above all, we want someone that shares our core principles. These are:

- We are Patient Centred
- We can be Trusted
- We can Deliver Quality
- We are Passionate
- We aim High

What we offer

- An annual individual training budget of up to £1000 linked to your objectives for your role
- 25 days holiday plus bank holidays
- Company Share Option scheme and travel loan after probation is passed
- An amazing team and fun social calendar
