

Junior Test Analyst

London, UK

Permanent

Up to £30,000 per annum

Who we are

At iPLATO we are more than a tech company. We are revolutionising the health care industry. We are committed to delivering powerful digital solutions that improve lives and to have fun while doing it. Serving millions of patients and thousands of healthcare professionals every day we are a leader in Health Tech. Across this network our digital solutions enable data driven patient engagement, personalised online consultation powered by machine learning and patient support to people living with diabetes, hypertension and epilepsy. Our aim is to connect patients and transform healthcare.

About the role:

The Junior Test Analyst is an essential role that is being newly instated into the technology team. You will be responsible for test management, quality assurance and the end to end testing of our consumer facing mobile apps and business to business web software.

Reporting to Test Manager, the main responsibilities will be to:

- Ensuring that our software deliverables are to a very high quality
- Providing status updates regarding test progress, results, and unresolved problems
- Carrying out testing and QA
- Creating and running end to end tests including API calls
- Setting up and maintaining test plans and test scripts
- Creating test harnesses
- Creating and defining a vision of improvement for testing and QA in the business
- Helping us move toward a continuous integration model of development

What we are looking for:

Essential:

- 3 years + technical testing and QA experience in a software development environment
- Experience of testing mobile apps
- Experience of manual/exploratory testing
- Experience of writing test scripts
- AQA related qualification - ISTQB or equivalent
- Previous demonstrable experience in setting up and managing test plans
- Experience of an Agile development environment
- A degree in a technical discipline, Computer Science preferred
- Great attention to detail
- Excellent verbal communication skills with the ability to communicate effectively with technical and non-technical colleagues at all levels
- Good problem solving and diagnostic skills
- The ability to work well under pressure and prioritise conflicting demands

Desirable

- Experience of code control systems like GIT
- Knowledge of API Testing
- An understanding of Performance Testing
- Some knowledge of Test Automation (e.g. Selenium WebDriver)

Above all, we want someone that shares our core principles. These are:

- We are Patient Centred
- We can be Trusted
- We can Deliver Quality
- We are Passionate
- We aim High

What we offer

- An annual individual training budget of up to £1000 linked to your objectives for your role
- 25 days holiday plus bank holidays
- Company Share Option scheme and travel loan after probation is passed
- An amazing team and fun social calendar
